

DSP Homework 02

1. Write a summary of this week's video(s) and your further thoughts on the content.
2. Find a way to determine how many different colors your eyes can see.
3. In general a person's mood changes continuously in a day. Determine the *right* uniform sampling period T of a person's mood in a day so that virtually no information is lost after sampling.
4. Write your first monthly project proposal.
